## Profile

As a meticulous front-end developer with 4 years of experience and a passion for responsive website design, I possess a strong foundation in HTML, CSS, JavaScript, Typescript, and front-end frameworks like NextJS, ReactJS and VueJS. I am also a blockchain enthusiast with knowledge of Web 3, allowing me to explore the intersection of front-end development and blockchain technology. This expertise enables me to create visually appealing and user-friendly websites that perform efficiently on any device. With a reputation for delivering high-quality work on time and within budget, clients can trust me to provide innovative and secure web experiences, leveraging front-end development and blockchain technology.

---

## Education

### Bsc. Computer Science

Landmark University

05/2023

Grade: First Class Honours(4.66/5.0) GPA

Relevant Modules: Data Structures and Algorithms, Cryptography and Network Security, Database Systems, Software Engineering, Operating Systems, Artificial Intelligence, Project Management.

Final year Project: Blockchain-based Supply Tracking

---

## Experience

### Blockchain Developer Intern

Yuki

10/2023 - 09/2024

Yuki provides the complete infrastructure needed for businesses to build, launch, and scale digital asset products.

- I collaborated with the senior blockchain developer to design and implement blockchain APIs
- I utilized GraphQL and other tools to enhance data retrieval and processing
- I assisted in developing and testing blockchain applications
- I participated in code reviews and debugging sessions
- I contributed to the optimization of blockchain solutions for efficiency and scalability

### Frontend Developer

Quibble

09/2023 - 09/2024

Quibble aims to bridge the gap in the vacation rental industry by offering a science-based approach to revenue management.

- I developed user-friendly interfaces and optimized performance, enhancing user engagement and satisfaction.
- I collaborated with cross-functional teams to deliver high-quality projects on time, fostering teamwork.
- I implemented responsive design techniques, ensuring seamless user experience across devices.
- I identified and resolved front-end issues, improving application stability and user trust.
- I utilized modern JavaScript frameworks to build scalable applications, driving innovation.

### Frontend Developer

EF Network Limited

06/2022 - 11/2023

EF Network Ltd is a conglomerate of subsidiary companies whose aim is to improve the normal conventional systems

and make life better, being your go-to company from everything related to security, broadband, safety and ecommerce service

- I built visual and aesthetically pleasing user interfaces
- I worked closely with UI designers to translate visual designs into functional user interfaces.
- I optimized the performance and usability of websites or applications by reducing file sizes, optimizing images, minifying code, and implementing caching techniques, thereby creating seamless user experience
- I carried out thorough testing and debugging to identify and resolve issues related to user interface
- I was responsible for consuming APIs to enhance web application functionality and data integration.

## Frontend Developer Intern

Hotels, NG, Finalist

10/2022 - 12/2022

HNG Internship is a large scale, fast-paced virtual internship for people learning code aimed at helping people learn and improve their skills by working on real-world projects.

Here I interned as a Frontend Developer,

- I wrote well designed testable, efficient code by using best software development practices.
- I developed pixel perfect web designs, with respect to the User Interface designed by the Product Designers
- I worked with legacy code, to improve projects that have already been built.
- I worked in larger and smaller teams to accomplish tasks before given deadlines.
- I also troubleshooted issues on the real-life projects given, and I also made research on certain incomprehensible concepts

## Frontend Developer

CyberRoot International Limited

05/2021 - 10/2022

CyberRoot International Ltd is a cyber security consulting and IT firm that specializes in information and intelligence gathering but also provides training for young people looking forward to creating aesthetically pleasing and responsive web applications

Here I was a frontend development developer,

- I assisted in the design and development of user interfaces using technologies such as HTML, CSS, JavaScript, and ReactJS
- Used web development frameworks to create and maintain web apps
- Worked with the team to develop and test responsive designs that adjust to multiple screen sizes

## Blockchain Developer Intern

Zuri Team

03/2022 - 05/2022

The Zuri Team is a high-quality training organization that helps train “coders” with hands on practice. They give weekly tasks, ranging from easy to complex, as one progresses from stage to stage till one is finally ready to continue learning and growing independently.

- I assisted in the design and development of smart contracts using Solidity
- Collaborated with the team to implement and test blockchain-based solutions.
- Participated in code reviews and contributing to the development of clean, efficient, and well-documented code.

---

## Skills

Solidity, VueJs, ReactJS, NodeJS, Git, GitHub, AJAX, HTML, CSS, Typescript, Docker, NextJs
