B.sc Computer Science,
Landmark University (First
Class)

👤 PROFILE

As a meticulous front-end developer with 3 years of experience and a passion for responsive website design, I possess a strong foundation in HTML, CSS, JavaScript, and front-end frameworks like ReactJS and VueJS. I am also a blockchain enthusiast with knowledge of Web 3, allowing me to explore the intersection of front-end development and blockchain technology. This expertise enables me to create visually appealing and user-friendly websites that perform efficiently on any device. With a reputation for delivering high-quality work on time and within budget, clients can trust me to provide innovative and secure web experiences, leveraging both front-end development and blockchain technology.

📁 EMPLOYMENT HISTORY

Frontend Developer, EF Network Limited

June 2022 – till date

EF Network Ltd is a conglomerate of subsidiary companies whose aim is to improve the normal conventional systems and make life better, being your go-to company from everything related to security, broadband, safety and ecommerce services.

Here I am a frontend developer,

- I have built visual and aesthetically pleasing user interfaces
- I work closely with UI designers to translate visual designs into functional user interfaces.
- I optimize the performance and usability of websites or applications by reducing file sizes, optimizing images, minifying code, and implementing caching techniques, thereby creating seamless user experience
- I carry out thorough testing and debugging to identify and resolve issues related to user interface
- I am responsible for consuming APIs to enhance the functionality and data integration of web applications.

Frontend Developer, CyberRoot International Limited

May 2021 — May 2022

CyberRoot International Ltd is a cyber security consulting and IT firm that specializes in information and intelligence gathering but also provides training for young people looking forward to creating aesthetically pleasing and responsive web applications

Here I was a frontend development developer,

- I assisted in the design and development of user interfaces using technologies such as HTML, CSS, JavaScript, and ReactJS
- Used web development frameworks to create and maintain web apps
- Worked with the team to develop and test responsive designs that adjust to multiple screen sizes

Frontend Developer Intern at Hotels, NG, Finalist

October 2022 — December 2022

HNG Internship is a large scale, fast-paced virtual internship for people learning code aimed at helping people learn and improve their skills by working on real-world projects.

Here I interned as a Frontend Developer,

- I wrote well designed testable, efficient code by using best software

development practices,

- I developed pixel perfect web designs, with respect to the User Interface designed by the Product Designers
- I worked with legacy code, to improve projects that have already been built.
- I worked in larger and smaller teams to accomplish tasks before given deadlines.
- I also troubleshooted issues on the real-life projects given, and I also made research on certain incomprehensible concepts

Blockchain Developer Intern, Zuri Team

March 2022 — May 2022

The Zuri Team is a high-quality training organization that helps train “coders” with hands on practice. They give weekly tasks, ranging from easy to complex, as one progresses from stage to stage till one is finally ready to continue learning and growing independently.

Here I was a Blockchain Developer intern,

- Assisted in the design and development of smart contracts using languages Solidity
- Collaborated with the team to implement and test blockchain-based solutions.
- Participated in code reviews and contributing to the development of clean, efficient, and well-documented code.
